Alberto Assumpção

Tech Lead · Senior Unity & C# Engineer

Rio de Janeiro, Brazil · alberto.de.assumpcao@gmail.com · linkedin.com/in/albertoa89 · albertoneto.github.io

SUMMARY

Tech lead and senior Unity/C# engineer with 10+ years shipping games on mobile, PC, console and VR: 5 shipped titles and 20M+ players. I design the architecture, build the hard systems myself (custom physics, multiplayer, live ops, editor tools) and keep design, production and engineering moving in the same direction.

EXPERIENCE

762 Interactive · Technical Lead — Oct 2025 – Present

- Lead the technical direction of a strategy game in development: architecture, engineering standards and code review, keeping the team unblocked.
- Bridge between design, production and engineering, aligning technical decisions with the product vision. Still hands-on in Unity 6 and C#.

Pink Mango · Founder & Lead Developer — Feb 2019 – Oct 2025

- **Mangut**, a precision platformer for Steam and Xbox (2027): fully custom kinematic movement and grappling hook, no Rigidbody; rope solver isolated behind 57 EditMode tests so game feel can be retuned without regressions.
- Built the speedrun stack (millisecond timer, instant restart, versioned Steam leaderboards) and a one-click Build & Ship editor tool (build + steamcmd upload).
- Owned production end to end: roadmap, creative direction and fundraising. Signed ID@Xbox publishing contracts; Top 10 in Embratur's "Brasil Tá Pra Game" award; 41-minute average demo session.
- **Rango**, a casual mobile game on Google Play: gameplay feel and a level editor built for fast iteration.

Gazeus Games · Unity C# Developer — Jan – Jul 2019 · Oct 2021 – Sep 2022

- **Dominoes Battle**: core gameplay, live ops (leagues, events, daily missions, economy) and platform integrations for Google Play, App Store, Facebook Gaming and Netflix Games. 4.7★ on the App Store.
- **Dominoes Jogatina**: ported the game from native to Unity (20M+ downloads), improving performance and maintainability.

Okoto Studio · Unity C# Developer — Nov 2020 – Jun 2021 · Sep 2022 – Nov 2023

- **Rabiola Tales**: developed and architected a VR kite simulator for Meta Quest, with custom kite flight physics (wind, lift, drag, line tension) and tracked-hand line control.
- **Rabiola Céu Aberto**: Unity projection client, Node.js WebSocket relay and web controller; up to 26 players flying at once from their phones, nothing to install. 2nd place at Pitch Black 2022 (US$25K).

Metaversando · Unity C# Developer — Apr – Dec 2023

- Multiplayer, cross-platform communication platform with voice chat, screen sharing and custom avatars, bridging Web and Meta Quest 2.

Rebuliço · Unity C# Developer — Aug 2019 – Dec 2020

- **NaÀra**, a 2D stealth platformer: core gameplay systems, level design tools and stealth AI behaviors.

Earlier — 2011 – 2018

- **Smash Mountain Studio** (2018): core gameplay, retention and monetization of BeJJ, a competitive jiu-jitsu mobile game.
- **Arcolabs** (2017–18): event-driven adventure-game creation framework, shipped with the MC Gui game.
- **YDreams** (2016–17): Genesis Mission at Barretos Cancer Hospital and the NBA Fan Zone at Rock in Rio, from architecture to delivery.
- **Clickaê** (2011–15): co-founder and technical lead, team of up to 5 engineers; product manager after the acquisition by Fnbox.

SKILLS

Unity (2D, 3D, VR) · C# · Game architecture & design patterns · Custom physics & game feel · Multiplayer & networking (WebSocket, Node.js) · Live ops · Automated testing · Editor tooling & build pipelines · Steamworks · FMOD · Rewired · Meta Quest · Git · Technical leadership

EDUCATION & LANGUAGES

Digital Games, Estácio de Sá University (2015–2018) · Computer Science, Federal University of Rio de Janeiro (2009–2011) · VR Bootcamp, Laboratório de Atividades do Amanhã (2017–2018)

Portuguese (native) · English (advanced) · Spanish (advanced)
